E217W

7" LINUX-BASED INDOOR MONITOR

Thanks to a 7" LCD touchscreen display, DNAKE indoor monitor E217 allows a vivid and clear view at the door. Navigation in the UI is also made intuitively for easy setup. Up to 8 IP cameras can be added to the indoor monitor, which enables you to check the live feed from cameras on the monitor. Both surface mounting and desktop options are available, delivering more convenience.

CLOUD-BASED INTERCOM APP

DNAKE Smart Pro App provides additional access to DNAKE door stations. Whether you're home or away, with DNAKE Smart Pro, you can monitor and communicate with the one at your door from your smart phone. Always know who's there and experience an easy and smart life.

VILLA SOLUTION

From one-touch calling and one-touch talking to one-touch unlocking, the villa solution provides thoughtful and useful functions. DNAKE IP video intercom kit is easy to use and does not require any special programming. You can choose to see and speak with the visitor, and unlock the door while onsite using the indoor monitor or remotely with the mobile app. With help of the DNAKE Smart Pro APP, you can always know who is outside and answer the door whether you are home or not. It can also be integrated with CCTV and alarm systems to offer more intelligence and security.
