

ASCOT Double Sided Gate Lock

Suited to gates and most types of doors that require a digital lock to be locked from both sides.

Australian Registered
Design No. 202215177

mcgrathlocks.com.au

Designed to make access easier.

The ASCOT by McGrath Locks is a double sided digital lock designed for the Australian market. A great addition to the home, office or business, this 4 in 1 digital lock is specially designed for external applications such as a gate, where both sides need to be independently locked. It provides a versatile and convenient method of entry that allows you to easily manage who has access to your property.

Utilising the powerful TTLock Bluetooth APP, lock and user settings are easily configured and managed. Access can be provided to family and visitors alike through pin code, RFID credential, eKeys managed via BLE and mechanical key override. By adding a McGrath Locks WIFI gateway you can remotely unlock the ASCOT from anywhere in the world using the TTLock APP.

The ASCOT has an IP66 rating which makes it ideal for external applications where a robust solution is required. The lock is supplied with a tubular latch but can also be installed with a mortice lock should the need arise.

Bluetooth

Pin Code Unlock

RFID Unlock

Key Override

WIFI (via gateway)

Features

Battery life

12 months (based on 10 uses per day)

Includes 4 keys (Keyed alike)

Both sides are locked so that entry cannot be gained by reaching through or jumping over a gate.

Works with the TTLock APP

Provides the ability to manage all lock settings and users including eKeys, pin code, RFID card/fobs.

Passage mode

Keep one or both sides open. Perfect for when you have deliveries or busy with the gardening etc.

Designed for the Australian market
