Ultra-Secua Screen Digital Bluetooth Lock

Australian Registered Design No. 202014467

Designed to make
access easier.

The Ultra-Secua by McGrath Locks is a digital lock designed specifically for screen door applications. A great addition to the home, office or business, this 4 in 1 digital lock provides a versatile and convenient method of entry that allows you to easily manage who has access to your property. The Ultra-Secua can retrofit most screen door locks on the market including triple locking screen doors. It has been designed with a unique security feature on the inside handle that can stop it from being operated through a damaged fly screen.

Utilising the powerful TTLock Bluetooth APP, lock and user settings are easily configured and managed. Access can be provided to family and visitors alike through pin code, RFID credential, eKeys managed via BLE and mechanical key override. By adding a McGrath Locks WIFI gateway you can remotely unlock the Ultra-Secua from anywhere in the world using the TTLock APP.

The Ultra-Secua has an IP66 rating making it ideal for external applications where a robust solution is required. The lock is supplied with a lock body, key cylinder and batteries to make your installation a breeze.
