		Blue	Yellow	75mm & 100mm	Aluminium 38mm
		Black	Titanium		

LSC

Complete SECURITY SOLUTIONS
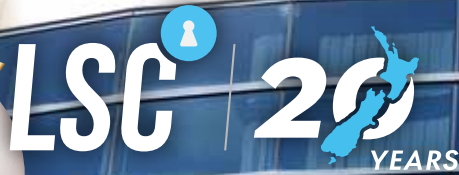

LSC IS PROUD TO BE CELEBRATING 20 YEARS IN NEW ZEALAND

Prior to 2004, LSC worked with a trio of local distributors to support our premium brands such as Silca.

We wanted to help customers over the ditch access the kind of Account Management and Support we offered in Australia, so in late 2003 a plan was hatched and we opened our new operation in Glenfield, Auckland in March 2004.

The initial team was small, but from those early years we still have a few people who are involved in our business today – both in Australia (Richard Hoares and Darren Lintern), and in New Zealand (Luke Hopewell and Vasant Vale).

From those early days, we dived into the market and quickly got in front of customers to help them access the best range of products in the industry. We attended trade shows and events, and brought our 'road-show' to venues all over the country.

We brought our original Show-bus over, and it made a couple of laps of both islands (and had its air-conditioner famously trashed by Kea parrots who chewed through some rubber hoses so it never worked again – quite the surprise to the Aussies who thought only they had aggressive natives).

Today our business in New Zealand is thriving, we quickly outgrew our original location in Argus Place, and the Poland Road site is full of great product from all over the world. Our local technical support and account management team are highly trained industry experts, and we're helping our customers evolve their business with electronic security, while maintaining traditional product innovation and quality.

We thank our customers for your support, and we hope to see you again at an LSC or Industry event soon.

LEADING AUSTRALIAN MADE BRANDS

Lockwood is the leading brand in the Australian locking industry. With a well-established reputation for high quality products, this iconic brand provides a wide range of locking solutions to residential housing, commercial building and industrial application markets.

ADI was founded in the mid 1975 by Locksmiths to meet the needs of Locksmiths. The inventors found that specialised locking products didn't exist, so they went about creating them.

Established in 1951, **K.J.Ross Security Locks** started out from humble beginnings to quickly grow to become Australia's most respected name in security products.

Established in 1987 **CS Technologies** is an Australian owned leader in designing and manufacturing solutions for the building access control and security market.

Kevron is an Australian company specialising in the manufacture and supply of identification products for keys, fobs, credentials and even your pet or your wine!

Established in the late 1980s, **D&D Technologies** is a company dedicated to the design and manufacture of top-quality, state-of the-art gate hardware products.

Austral Lock is the Australian market leader of premium door and window hardware, providing locking solutions for windows, security screen doors (hinged or sliding) and sliding patio doors (aluminium or timber).

Lock Focus has been at the forefront of lock mechanism innovation in Australia since 1972. They continue to manufacture the majority of their products in Australia, making Lock Focus one of the last lock manufacturers in the country.

Founded in 1917, **Sutton Tools** remains an Australian family business that is renowned for its high-quality power tool accessories and cutting tools for the hardware market and a wide range of specialised industrial applications.

Telkee Key Cabinets is Australia's #1 Key Management Solution. For over 70 years they have manufactured commercial quality lockable key management systems in Sydney, Australia.

SILCA®

ADVANCED DIAGNOSTICS

SD7A7047ZB   SD854589AD

Get the power of the Silca Cloud into your shop!

The history of transponder machines was that traditionally, the 'smarts' of the machine were inside it, onboard and in your hand. That was fine when there were only a few different types of chip and technology in use. Fast forward 30 years since we first saw transponders in vehicles, and there are over 100 transponder technologies in use. Offline devices using old technology can't keep up.

Today, over half a million keys are cloned every year globally using Silca's cloud-based solution with RW5 and Smart Aerial Plus.

- Over 100 transponder technologies covered
- One target chip covers 98% of applications
- Online updates are automatic and seamless
- Average cloning time less than 40 seconds
- Silca's small, compact devices are easy to use
- New technologies are added continuously
- Set and forget solution covers the widest range

Advanced Diagnostics SMART Pro Software Honda

- Programs proximity keys to select Honda models
- Includes All Keys Lost situations
- Add or erase keys
- Bypasses immobiliser security
- Internet access required for connection to Advanced Diagnostics proprietary server
- Refer release notes on LSC product webpage or MYKEYSPRO for Applications List

HID | THE LEADER IN ACCESS CONTROL

HID Global is the global leader in access solutions. Since its establishment, HID Global has become synonymous with innovation in identity and access management technologies. Its solutions are used in over 100 countries across a range of industries, including government, healthcare, financial services, education, and enterprise, securing billions of transactions annually.

Physical Access Control Systems (PACS)

HID offers advanced access control technologies, including Readers, Mobile Credentials, and Biometric systems, ensuring secure access to facilities and sensitive areas.

Identity and Credentials

HID produces a wide range of secure credentials, including contactless cards, smart cards, and NFC-based mobile IDs.

Card Printing Solutions

HID Fargo printers are industry leaders in creating high-quality, durable ID cards for businesses and institutions.

HID Global plays a critical role in shaping the future of secure identities. Through its innovative solutions, the company empowers organisations to create safer environments, protect sensitive information, and streamline operations. HID Global is a trusted partner of LSC for identity and access management solutions worldwide.

RISCO

2024 saw the release of several new products from RISCO as well as the reintroduction of products due to popular demand.

Let's take another look at what's new and what's back in the RISCO range.

Wireless 2-Way Indoor Sounder

RISCO's new Wireless 2-Way Indoor Sounder combines the most advanced technologies within a contemporary, compact and streamlined design, the ideal choice for homeowners seeking the highest safety standards. The indoor sounder has been designed for use in family homes, apartments or small offices. The indoor sounder is easy to install and is compatible with all RISCO's systems.
RWS33200400A

WiFi Video Doorbell Camera with Wireless Chime Kit 916MHz

The new Video Doorbell is designed to enhance security and provide convenience to home and business owners.
RVDBA701009A

Wireless 2-Way Slim Door/Window Reed Switch

The 2-way Wireless Slim Door/Window Contact is a small footprint device ideal for wireless perimeter door/window protection in residential and commercial applications.
RWX780433M3A

LuNAR Grade 3 360 Degree Dual Tech Ceiling Mount Detector, Anti-mask

The LuNAR RK150DTG3 detectors are the ultimate ceiling motion detectors for professional installations, incorporating both Anti-Mask and Anti-Cloak™ Technologies (ACT™), adhering to new environmentally friendly guidelines.
RK150DTG300D

3.5Amp Switching Mode BUS Power Supply, suits LightSYS+

The 3.5 Amp power supply expansion module is a reliable and cost-effective solution for installers with the flexibility of installing it in its own enclosure away from the control panel, while remaining fully supervised.
P432EPS350A

ShockGard 2 Grade 3 Shock Sensor

The Shockgard G3 electronic shock sensors have been designed utilising the most advanced microchip technology to provide reliable effective false alarm resistant protection.
GT06097A

WatchIN Grade 3 Dual Tech Indoor Detector, includes Swivel Bracket

The WatchIN™ Industrial Grade 3 Detector provides superior catch performance and immunity to false alarms, especially in extremely harsh environments such as production areas, warehouses, construction sites, shopping malls and hangars.

EVENT PREVIEW 2025

2025

In 2025, LSC is proud to exhibit and support our valued trade partners at a variety of key events pivotal to the security industry. These gatherings unite security professionals from around the globe, fostering collaboration, innovation, and progress within the field.

Throughout the year, attendees will benefit from numerous opportunities for professional development, including hands-on training sessions, informative workshops, and the prestigious annual celebrations. These events provide a platform to exchange ideas, share expertise, and build lasting connections.

LSC remains committed to supporting the continued evolution of the security industry. Together, we strive to meet the challenges of tomorrow and deliver solutions that set new standards in safety and security.
