New Software Update for Mazda® 2018 and 2019 models
ADS2267 - Code D751989AD
FIRST AFTERMARKET SOLUTION IN THE WORLD

July 2019

Advanced Diagnostics is pleased to announce the update of the ADS2267 key programming software for Mazda® vehicles from 2017 onwards.

What does the software do?

The ADS2267 software programs proximity keys for selected Mazda® vehicles with push button start. This software allows keys to be added or programmed from a lost key situation.

The software has been designed to bypass the pincode automatically in the background, making it a seamless process when programming keys. The remote fob programming is performed automatically as part of the procedure when using ADS2267.

Prior to this update only 2017 models were supported. This update brings coverage to select 2018 and 2019 models.

Note: This software is available for Smart Pro only.

What else will I need?

Smart Pro
