

Software Update ADS2281 Mitsubishi* ECU Recovery Code D753916AD

July 2024

UNIQUE, FIRST TO MARKET SOLUTION Avoids the need for an expensive dealer repair.

Advanced Diagnostics is pleased to announce an update to the ADS2281 Mitsubishi software to repair a broken inter-ECU link. During diagnostic key reading on a variety of Mitsubishi models the link to the ECU can be disrupted, leaving the vehicle immobilized and potentially needing an expensive dealer intervention. Data link disruption can also occur through routine ECU malfunctions over time.

What does the software do?

The recovery software detects if an error is present and rectifies the issue without invasive EEPROM procedures or the need for a costly ECU replacement.

Once the ECU data link has been repaired, key programming can be performed safely using the Smart Pro for all the models listed below even in an all keys lost situation.

What else is needed?

Smart Pro

OFFER DETAILS	Using tokens	Using UTP	Using purchased software
Cable	ADC2000	ADC2000	ADC2000
Software category	A	A	A
