

Key Programming Software Update Toyota* ADS2328 - Code D756605AD

July 2024

Programmes proximity and bladed keys for an extensive range of popular recent Toyota and Lexus models.

What does the software do?

Using Smart Pro and the unique range of Advanced Diagnostics' emulator and bypass cables, keys can be programmed for various system Toyota and Lexus models even in an all keys lost situation and when an alarm is active. The software bypasses the security pincode and programmes the remote and transponder at the same time.

Server Connection required

The AD2328 software requires an internet connection to access the programming calculation in the proprietary Advanced Diagnostics server.

What else is needed?

OFFER DETAILS	Using tokens	Using UTP	Using purchased software
Cable	ADC2000	ADC2000	ADC2000
Software category	A	A	A
Smart Aerial+ required	No	No	No
Server connection & key programming	3 tokens	Included	Included
