

## Key Programming Software 2024 Update compatible with Renault\* ADS2287 - Code D753916AD

August 2024

Advanced Diagnostics is pleased to announce the release of an update to the ADS2287 software which now incorporates an improvement to the key programming process for many applications. The application list has been expanded to include several other popular models added since the original software release.

### What does the software do?

The ADS2287 software programs keys for various Fiat, Opel-Vauxhall, Nissan, Renault, Dacia and Smart vehicles worldwide securely even in an all keys lost situation. The software bypasses the security pincode during the procedure and programs the remote and the transponder at the same time.

The software programs the vehicle key in only 3 or 4 minutes, and gives an improved user experience, along with the ability to recover the vehicle UCH module if data files become corrupted.

All the keys and remotes have to be erased before programming new ones. The Smart Aerial+ is required for precoding procedures.

### What else is needed?

RN-N01R11

VA2P26

VA150S13

Smart Pro

Smart Aerial+

### OFFER DETAILS

Cable	ADC2000
Software category	A
Smart Aerial+ required	Yes - for precoding
Other software required	No
